Friends groups come in all manner of shapes and sizes. Some dedicate themselves to restoring native grasslands in suburban Melbourne, others work in forested landscapes like Bunyip State Park. But no matter where they work they all have amazing stories to tell.

The Victorian Environment Friends Network are proud to acknowledge Aboriginal and Torres Strait Islander Peoples as the Traditional Custodians of the Country on which we live and work. We value and respect their deep and continued spiritual and cultural connections to the land, waters and seas, and pay our respects to their Ancestors, and Elders past, present and future.
